

## Customized On-Site Training

Organizations find that offering their employees a **SERIES OF WORKSHOPS** is the best way to reinforce learning and keep everyone involved.

“Recently, more than 20 of our senior and mid-level managers attended a **series of management training workshops** provided by the Support Center.

The staff unanimously applauded the training, which has greatly improved our agency-wide professionalism in operations and human resource supervision.

Our managers now all have the same valuable & practical set of skills needed to maximize their performance.”

—Saint Nicholas Neighborhood Preservation Corporation

“The Support Center has great resources, including facilitators who understand the issues affecting nonprofits.

**Our grantee organizations that participated in these workshops [covering fundraising strategies, basic management and supervision skills] really grew from the experience.**

The networking aspects have been very beneficial as these groups have the opportunity to hear about what others are doing in their respective communities.”

—America's Second Harvest

### The Support Center's customized workshops are:

- Facilitated by experts
- Specially-designed curricula
- Interactive exercises, case studies, and role plays
- Half-day, full-day or multi-day trainings
